What is an MPO?

A metropolitan planning organization (MPO) is, by federal law, designated by the governor of each state for every urban area with at least 50,000 residents. MPOs develop solutions to regional transportation problems and address other important issues such as land use, air quality, energy, economic development, commerce, and quality of life. Each MPO develops a long-range regional transportation plan to guide transportation decision making and activities. The MPO also develops a short-range program of projects to be implemented with federal transportation funds. For each project the MPO's responsibility is to engage many stakeholders, including the general public, in the planning process. By creating a vision for the region in the long-range plan and by identifying projects and investments that help achieve that vision, the MPO ensures that scarce federal transportation funds are wisely invested.

How the Capital District Transportation Committee Benefits Your Community

The Capital District Transportation Committee (CDTC), was formed in 1964 and covers the counties of Albany, Rensselaer, Saratoga, and Schenectady. CDTC is a forum for plans and ideas, as well as decisions about major capital investments. The entire community—businesses, government, and citizens—has a voice in the process. Whether the topic is a dangerous intersection or a long-term policy issue, the region's future is shaped by decisions made by CDTC.

Key Projects

Explorations of the Future 2040

The CDTC's New Visions 2040 is a transportation plan for the future of our region. The Plan emphasizes four themes:

- Preserve and manage the existing investment in the region's transportation system.
- Develop the region's potential to grow into an attractive, vibrant, and diverse metropolitan area.
- Link transportation and land use planning to meet the Plan's goals for urban investment, concentrated development patterns, and smart economic growth.
- Plan and build for all modes of transportation, including pedestrian, bicycle, public transit, cars, and trucks.

The Transportation Improvement Program (TIP)

A key responsibility of CDTC is selecting projects for the use of a wide variety of federal highway and transit funds. CDTC's "TIP" totals over \$100 million annually in federal transportation funding for highway, transit, rail, airport, and port projects. Innovative practices balance projects by type to best reflect the priorities of the long range plan. Examples of TIP funded projects in our region include:

- Washington Avenue and Fuller Road Intersection Reconstruction, City of Albany
- I-90 Exit 8 Connector, North Greenbush
- Zim Smith Mid-County Trail, Saratoga County
- Erie Boulevard Reconstruction, City of Schenectady
- NY 5 Bus Rapid Transit, Regional

Linkage Planning Program

CDTC's linkage program addresses both local and regional transportation and community priorities through planning efforts administered by CDTC and guided by local government. Over eleven years, CDTC had advanced 73 separate Linkage Studies with 40 municipalities and public entities. The total investment of federal, state, and local funds in Linkage Planning has exceeded \$4.7 million, making it one of the most significant regional-local planning programs in the nation.
